DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. Claim 15 has been amended. Claims 1-20 are currently pending.

Claim Objections

3. Claims 1 and 8 are objected to because of the following informalities: both claims 1 and 8 recited a step of "examining" but to not state an object from the claims that is being examined. Appropriate correction is required.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 8-14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

With respect to claims 8-14, claim 8 recites a "machine-readable medium", and in accordance with applicant's specification this includes "electrical optical, acoustical or other forms of prorogated signals (e.g. carrier waves, infrared signals, etc)" (paragraph [0023] on pgs 8-9). This subject matter is not one of the statutory categories of invention, it is not a process, machine, manufacture, or a composition of matter. "carrier

waves, infrared signals” are a forms of energy and thus does not fall within one of the statutory categories.

Response to Arguments

6. Applicant’s arguments, see pgs 8-15, filed on 06/04/2008, with respect to Watanabe have been fully considered and are persuasive. The 35 USC 102(e) rejection of claims 1, 2, 5-9, and 12-20 has been withdrawn.

Allowable Subject Matter

7. Claims 1-7 and 15-20 are allowed.
